

Herpesviridae* Virus

- 1·Viral Envelope
- 2·Lipid Bilayer
- 3·Membrane Glycoproteins (For cell fusion)
- 4·Transmembrane Portion of Membrane Glycoproteins
- 5·Nucleocapsid
- 6·Capsid Proteins (Capsomeres)
- 7·Hexons
- 8·Vertex Proteins (Pentons)
- 9·Portal Vertex (For entry and egress of DNA)
- 10·Double Stranded DNA (Viral genome)
- 11·Nucleoprotein
- 12·Tegument (In between capsid and envelope. Not shown)
